

Door Latch for Dishwashers

Description

Dishwasher door latch with integrated microswitch placed on the door of the dishwasher.

It provides a feedback signal to the electronic board, related to the state of the lid (open/close). In case of abnormal operation, the automatic system auto-reset is activated. It is possible to

configure it with one or two microswitches to detect door closure.

Push to close / pull to open. Self recovery in overtravel position. Excellent opening and closing feeling for end user.

Main Benefits

- System auto-reset in case of abnormal operation
- Mounting on door
- Self recovery in overtravel position

Certifications
