

Magnetic Doorlock Push-Push System

Description

Door locking system for front loading washing machines with high mechanical performances and auto-opening function at the end of the washing cycle.

A push-push magnetic doorlock that keeps the door closed when the washing machine is in stand-by and locks the door during the washing cycle. The user finds great comfort in opening and

closing the door. The door opening is managed by electronic and can be configured as instant, delayed or remote.

Reduced dimensions and high safety in the locking system. Low noise when locking or unlocking. Easily customizable in a short time according to customer needs. The product complies with all safety requirements imposed.

Main Benefits

- Handle NOT needed - removing of the handle on the door (flat surface)
- More care for clothes and gasket thanks to air circulation
- Ready for "gestures interaction"
