

Modular Switch

Description

SA series is the right development of modular switches manufactured just to be used on household appliances. Switches can be mounted individually directly on the unit to which they are applied or alternatively one or more switches can be pre-mounted on a bracket. This is possible thanks to our specialized push-fit system.

SA switches can be manufactured either in the momentary version or in the maintained one. Snap-in fixing on panel by means of self-locking pins, on upper part of switch. Possibility of shaft pre-loading up to 1 mm max without altering the electric operation of switch.

Main Benefits

- Choice between single and double pole
- Plug-in with customizable button

Certifications

Rold SA Series

Modular Switch

All products are approved to current Quality Standards. The Company reserves the right to make technical modifications to improve the product. Sizes indicated are not binding. For special applications, not mentioned here, please ask the manufacturer for further information. Uncorrect electrical wiring or assembling may cause overheating of the switch and consequent risk of short-circuit and fire. Update: March 2022
